

Latham International Filter Cloths & Filter Plates

WORKING TO PROTECT THE ENVIRONMENT

Latham International Ltd are committed to supplying a wide range of proven textile Filter Cloth, manufactured to very high standards, to give optimum performance for our clients, in today's demanding market by improving performance and efficiency and characteristics.

A range filter fabric in woven constructions of monofilaments, spun and multifilament yarns.

Fabrics made from Polypropylene, Polyester and Nylon in various weave patterns and special finishes to enhance filtration and cake release.

We also supply a wide range of injection moulded polypropylene Filter Plates to suit membrane or recessed chambers and plate and frame, thus providing the best solutions to any specific Filtration Process in the marketplace today.

Also available are alternative materials for specialist applications.
